

Test Unit – with air driven pump

HYTOR's "standard" test unit is built in a SS316 tube frame, fitted with SS316 tubes and valves.

The standard unit has the following specifications:

- Output pressure: 0 – 4000 Bar, dependent on type of pump and air supply
- Outlet for test pressure
- Outlet for external pressure recorder
- Filter regulator for control of air supply
- Pressure gauges:
 - 1 off Ø100 mm for outlet pressure
 - 1 off Ø63 mm for air pressure
- Outlet for test gauge, 1/2" BSPP female

- Shut off valves for: Air supply, test gauge, pressure recorder, test pressure and drain
- Size: 410 x 550 x 330 mm (H x W x D)
- Weight: App. 15 kg
- Available with ATEX, CE, Material certifications.

If you have special demands for specifications or design, we are able to provide a wide range of different units. For further information please contact HYTOR.
